EDUCATION

Georgia State University, Atlanta, GA Expected Dec 2028

B.S. Computer Science, minor in Political Science

- Relevant coursework: Calculus I / II, Theoretical Foundations of Computer Science, Ethics in Computing

EXPERIENCE

Georgia State University, Atlanta, GA: Undergraduate Research Assistant Oct 2026 - Present

Data Engineering Lab (DELab), Dr. Esra Akbas

- Researching adversarial robustness of graph neural networks; present recent papers to the lab

Penn Law LLC, Atlanta, GA: SharePoint Administrator (part-time) Aug 2026 - Present

- Built a Python migration engine that streams ~19 TB of files from ShareFile to SharePoint through Microsoft Graph on a HIPAA / HITECH-compliant Azure VM (encryption at host, certificate-based app-only auth)
- Verified every file bit-for-bit in a single pass (MD5 on read, QuickXorHash on write) and logged each transfer to a JSONL chain-of-custody record
- Designed an adaptive (AIMD) concurrency controller, based on published transfer-tuning research, that maximizes throughput under SharePoint throttling and warm-starts from prior runs
- Leading the firm's move off a legacy case management system onto Microsoft 365: SharePoint case sites, Power Automate flows, and Power Apps

Microsoft, Redmond, WA: Software Engineer Intern May 2026 - Aug 2026

OneDrive SharePoint, Core Tenant Admin team

- Built Model Context Protocol (MCP) server tools in C# that automate code review for the OneDrive SharePoint organization
- Enforced internal engineering standards through automated review tooling integrated into the team's development workflow

Microsoft, Redmond, WA: Explore Intern May 2025 - Aug 2025

OneDrive SharePoint

- Built a Visual Studio extension in C# embedding a context-aware coding agent grounded in OneDrive SharePoint's monorepo, with a custom chat UI to work around Visual Studio's native agent APIs; shipped to org engineers

Microsoft, Atlanta, GA: Discovery Intern Jun 2024 - Aug 2024

Azure Core

- Led a UI/UX overhaul of the Azure mobile app and presented at a VP-level demo day; the design shipped within 4 months, lifting positive user feedback 27%

DeKalb County School District: IT Helpdesk Intern Jan 2024 - May 2024

- Supported students and staff across Windows and Mac; repaired laptops, tablets, and projectors

Georgia Tech Research Institute, Atlanta, GA: Research Intern Jun 2023 - Jul 2023

- Co-built an AI-integrated Flask web app that teaches K-12 students programming fundamentals

PROJECTS

How Did Your Rep Vote? **howdoesmyrepvote.us** React, Flask, Python

- Solo-built civic tool: look up your members of Congress by address and see their recent roll-call votes in plain language, ranked by the issues you pick; data from congress.gov and senate.gov, CI with 100+ tests

BreakPoint Python

- Automatic cue point detection for DJs: analyzes audio to find drop points for seamless mixing

SKILLS

Languages: Python, C#, JavaScript, Java, HTML/CSS
Tools & platforms: React, Flask, Microsoft Graph, SharePoint, Power Automate, Power Apps, Azure, MCP, Git, Visual Studio, Figma, Blender, Maya

AWARDS

AP Scholar with Distinction (2023); College Board National African American Recognition Program and National Rural and Small Town Recognition Program (2021-2022)
